Cooking and baking with Feelware

Feelware C - comfort and safety without compromise for cooks

The Feelware C conversion kit fits for almost all electric cookers, ovens and hobs with rotating knobs, regardless of whether they are retractable or fixed. The Feelware C control knobs with tactile and visual symbols replace the original control knobs and give you comfort, control and safety while cooking and baking.

Your advantages is short:

- Ergonomic operation of all functions of the appliancee
- Very good perceptability of the tactile and visual symbolse
- Fast and precise control of hob and oven functionsl
- Safety against mix-up and maloperation of control knobsw

Feelware C control knobs are custom made for your appliance. Prior to purchasing Feelware C knobs, you can test them with a demo-kit. Please reach out to us for an individual consultation and offer.

Feelware C control knobs monuted on an electric cooker: The rotary knobs are equipped with large white symbols on a black background. They have tactile symbols to allow a safe and comfortable operation of the appliance. All knobs have tactile symbols on their front side which help to attribute the knob to the different elements of the cooker. Furthermore, the knobs for the hob look and feel very different than the oven knobs.

Feelware P - the universal conversion kit for electric cookers

The tactile symbols of the Feelware P conversion kit are glued to the original control knobs of cookers and give you the safety which is so essential when cooking and baking.

- Simple, intuitive operation of the main functions
- Safety against mix-up and maloperation of control knobs
- Strong adhesive for durable installation
- Easy to learn with audible instructions

Feelware Markers - Useful helpers for your household

You use tactile bumper dots in your household and you are annoyed with their poor durability and the limitations of marking different or complex items? Feelware Markers come with extra-strong adhesive to make your markings last. Feelware Markers are available in two versions:

Feelware Dots are general purpose markers with a prominent dot. A set consists of 10 pieces.

Feelware Symbols are unique markers with 10 different symbols. They allow for clear marking of control elements and settings.

The Feelware Dots (top) have a prominent dot. Feelware Symbols (bottom) come with different distinct symbols.
